ABOUT EFS GVM UPGRADE

EFS GVM upgrades provide a safe and effective way to legally increase your vehicle's Gross Vehicle Mass (GVM). Engineered by EFS, these Second Stage of Manufacture (SSM) solutions enhance weight-carrying capacity without compromising performance or handling. Rigorous testing ensures compliance with ADR safety standards and Federal Government regulations, giving you peace of mind when carrying heavier loads. Backed by a three year, 100,000km nationwide warranty. Ideal for tradespeople, contractors, and off-road touring, EFS GVM upgrades let you transport additional equipment, tools, or accessories while ensuring safety for all road users.
